Given the Company's current size and level of operations it does not have an internal audit function.

Due to the size of the Company, the Board does not consider it necessary at this time, to formally conduct an internal audit function. The Board continually monitors the risk management and internal control processes adopted by the Company to ensure they are appropriate to the operations of the Company's group structure. The Board is satisfied with the current level of risk, risk management and control monitoring within the Company.

The Risk Management Policy is available on the Company's website in the Corporate Governance Section.

ASX Recommendation 7.4: a listed entity should disclose whether it has any material exposure to economic, environmental and social sustainability risks and if it does how it manages or intends to manage those risks.

The Company has exposure to economic risks, including general economy wide economic risks and risks associated with the economic cycle. The Company has in place risk

management procedures and processes to identify, manage, and minimise its exposure to these economic risks where appropriate.

The operations and proposed activities of the Company are subject to local and national government laws and regulations concerning the environment and social sustainability. As with most exploration projects and mining operations, the Company's activities are expected to have an impact on the environment. It is the Company's intention to conduct its activities to the highest standard of environmental obligation, including compliance with all environmental laws.

Biodiversity, air, land and water resources could potentially be impacted by operations. This carries a risk of increased costs or time delays in working towards mitigating or preventing the impact.

In particular, water plays an essential role in the operation of the mine. As such, water scarcity or restrictions to access along with water excess (e.g flooding) could impact operations.

The Company takes social license to operate seriously and intends to report in subsequent annual reports on its Environmental, Social and Governance (ESG) performance.

The Company's projects cover a large area of land with a significant local population. The Company will continue to engage with the traditional owners, landholders, municipalities, local communities, and other stakeholders through the life of the project and ensure that they are dealt with fairly and are understanding and supportive of the project.

The committee chair is independent director Paul Kitto.

The relevant member qualifications for each member are reported in the Annual Report.

The level and composition of remuneration for directors and senior executives is readily determined by what would normally be paid to incumbents in similar sized companies.

The Remuneration Committee Charter and the Nomination Committee Charter is available on the Company's website in the Corporate Governance Section.

ASX Recommendation 8.2: a listed entity should separately disclose its policies and practices regarding the remuneration of non-executive directors and the remuneration of executive directors and other senior executives.

The Company's Securities Trading Policy sets out the circumstances in which the Company's directors, executives, employees, contractors, consultants and advisors are prohibited from dealing in the Company's securities. The Policy does not inhibit participants in an equity-based remuneration scheme from entering into transactions (whether through the use of derivatives or otherwise) which limit the economic risk of participating in the scheme.
